

# General Use Backs

The new adjustable tension **Invacare® Versair™ Back** is designed for positioning and comfort, offering versatile and clinically beneficial solutions when standard sling upholstery does not meet an individual's need. Wide tension straps are easily adjustable to accommodate positioning requirements with maximum support. They can be adjusted taut in the lower back for optimal sacral support or relaxed in the upper back to accommodate a thoracic kyphosis. The padded back upholstery uses mesh fabric for added comfort and improved airflow between the user and the back.

**HCPCS Code**  
**E2611/E2612**

Mesh fabric effectively dissipates heat and moisture.
