T2-841SWL-22

Action: **Designed to…swivel/LOCK**

Benefits: The Swivel feature enables a person to seat themselves without assistance, as the seat of the chair rotates opens 90 degrees R or L. Once seated they can rotate themselves towards the table.

Features: An armed chair fitted with a seat that swivels independently from the legs of the chair. Two seat heights (18” / 20”) are available.

T2 Caddie shown with hand brake release.

The T2 Series of Chairs

The T2 Series is designed specifically for use in LTC communities and for in-home care settings. The mobility features of the T2 Series address many of the daily challenges experienced by caregivers. ***How does a caregiver move a seated person safely and gently up-to the table?***

The hallmark chair within this series is the T2 c/w Chair Caddie. The Chair Caddie is designed to fit within the footprint of the chair and features a “hand release” braking system which ensures the wheels, by default, are always locked, until disengaged by a caregiver. To disengage the wheels a caregiver lifts the handle positioned at the top of the back.

Mobility features of the T2 Series enable chairs to be matched to the needs of each resident. When incorporated into a care community, T2 chairs ***reduce*** *workplace injuries and* ***create*** *a more enjoyable mealtime routine!*
